

ENTityXL & SDXL LED NasoView Nasopharyngoscopes

Material compatible with *STERIS Revital-Ox™ Resert®*, *Rapicide OPA/28*, *Metricide OPA Plus*

Optim's exclusive line of XL nasopharyngoscopes offers the physician a completely portable device to perform nasal endoscopy and laryngoscopy virtually anywhere. With Optilux™ patented lighting technology built directly inside the handle, the need for separate, cumbersome, external light sources is eliminated.

Features & Benefits

Compact, all-in-one design—By giving you total freedom of movement, the ENTityXL enables you to make endoscopy part of every regular exam, enhancing patient care.

Better economics—Greater flexibility equals more patient exams per day, increasing revenue. Unique integrated design reduces capital expense and ongoing maintenance costs.

Superior lighting—Patented Optilux lighting coupling technology focuses and shapes the light, delivering more brightness where it counts: at the end of the scope. This enables clear visibility of true vocal chords—a critical test of endoscopic lighting intensity and quality.

Rugged and reliable—Constructed in the USA of precision-machined aluminum, the ENTityXL is built to be durable in real-world clinical conditions. Rechargeable batteries provide power for an entire day of exams in the busiest practice.

CE
Optilux™

The ENTitySDXL features a slimline 2.7mm insertion shaft making it the preferred choice for diagnostic evaluation of narrow upper airway passages in both adults and children.

The ENTityXL makes diagnostic examination of the nose and throat for viewing of the nasal passage ways and larynx as easy to use as a stethoscope.

Specifications

Flexible length	30cm (11.8")
Overall length	53cm (20.9")
Shaft diameter	2.7mm
Weight	11.6 oz.
Articulation range	110 degrees up / down
Depth of field	5mm to 50mm
Field of view	85 degrees
Battery	Li-ion
Magnification power	45x or 30x

Specifications

Flexible length	30cm (11.8")
Overall length	53cm (20.9")
Shaft diameter	3.6mm
Weight	11.6 oz.
Articulation range	135 degrees up / 135 degrees down
Depth of field	5mm to 50mm
Field of view	70 degrees
Battery	Li-ion
Magnification power	30x
